

General

Thursday, January 30, 2025 8:43 PM

Notes 12/02/25

- ☒ Adjust estimation method to combine Poker Planning and T-Shirt Sizes -> Tobi
- ☒ Fill out the estimates into the Gantt chart -> Tobi
- ☒ Reference Check -> Gesine
- ☒ Finish the cost structure (with estimation) -> Tobi
- ☒ Check Spelling & Design -> David
- ☒ Shorten to 1000 (+10%) -> David
- ☐ Criticality -> All
- ☒ Add WBS for Runi -> David
- ☒ Check WBS & Paragraph for ARMBand -> Gesine
- ☒ Add estimates table to appendix (incl. Explanation of t-shirt sizes) -> Tobi

Notes 09/02/25

- ☒ Creating Gantt Chart for Runi -> Tobi
- ☒ Creating Gantt Chart for ARMBand -> Tobi
- ☒ ARMBand WBS remove numbers -> Gesine
- ☒ For both Gantt Chart add the Roles of the project (use the tags) -> Gesine

Notes 05/02/25

- ☒ Tobi goes through both project methodology suggestions to check if we can proceed with agile for both or add one hybrid approach **Update 09/02/25: modified Runi's methodology to a hybrid (waterfall and agile) approach**
- ☒ Tobi checks content of both paragraphs
- ☒ Gesine creates WBS for ARMBand
- ☒ David creates WBS for Runi

Max. 1000 words

Deliverables

- ☒ recommend the best project management methodology for each project, with appropriate justifications for each -> 150 words roughly (Armband: Gesine / Runi: David)
- ☒ enumerate the 5 key requirements for each product in the form of gherkin statements -> Tobi & Create Draft for Report
- ☒ creating a WBS/Project Network diagram that enumerates the “work packages” that are required by each project (Armband: Gesine / Runi: David)
- ☒ create a detailed project plan (using a Gantt Chart) that shows how the work packages would run in parallel, and the duration of each package. Do not forget to include work packages for software development and the various testing stages – including unit, integration, and user acceptance. Remember that even “free” packages (for example development or testing provided by community resources) still takes time and must be included to provide a fair comparison in the elapsed time calculations.
- ☒ You are required to estimate the time required for software development (including porting), testing, and any required documentation. You should justify the estimates you have made. Bear in mind every package you created for the WBS needs an estimate and should appear on your plan. You also need to create an estimate of the total cost to bring these products to market (excluding advertising and promotion which is what DJ Ascentia is needed for!).

- ☒ Recommendation

- ☒ Introduction/Executive Summary -> Tobi
- ☒ Check Spelling and Design
- ☒ Shorten to 1000 words
- ☒ Design Appendix (e.g. Move Gherkin Statements to the Appendix)
- ☒ Fulfill Grading criteria:
 - ☒ **Criticality**
 - ☒ Professional Structure
 - ☒ Application of knowledge and understanding
 - ☒ Knowledge and understanding of the topic
